PROFESSIONAL EXPERIENCE

Cloud AI Software Ecosystem Development Intern | Arm, Inc., San Jose, California *Jun 2026 - Aug 2026*

- Reduced manual effort in gathering partner interaction updates by over 90%, cutting a week-long process down to a few hours, by building an agentic workflow end-to-end that collected signals, generated updates, and routed them through human review
- Enhanced reliability of AI-generated updates by testing the multi-agent system for accuracy and refining it with a feedback loop from user approvals, resulting in over 85% of AI-drafted updates approved without edits during human review
- Improved product fit by conducting user research across the Cloud AI team, mapping pain points, building an initial MVP to validate user needs, and accelerating design iteration through v1 and v2 design files created using Figma MCP in Codex
- Expanded access to partner context by building a RAG-based chatbot and action-item board that cut average time to find updates, risks, and blockers from minutes to seconds, letting users query it all from one interface and make decisions
- Converted user requirements and UAT feedback into a 21-feature roadmap and shipped the AWS-hosted tool through a 4-week sprint plan, integrating Jira, Slack, Confluence, and GitHub while validating the system through QA and regression testing

Product Strategy Consultant | SutureTech, Raleigh, North Carolina *Jan 2026 - April 2026*

- Gathered and analyzed product requirements by synthesizing VoC from 20+ user interviews and 6.5K+ survey responses, translating insights into structured PRDs, user stories, and sustaining 95% sprint velocity on Jira
- Built software ecosystem demos and blog content for 100+ external partners that converted 5+ partners into pilot programs
- Led value-based pricing strategy and revenue modeling, evaluating 7 competitive benchmarks for capital allocation of $15M

Associate Product Manager | Reliance Jio Platforms Limited, Mumbai, Maharashtra *Oct 2023 - Jun 2025*

- Developed an NLP sentiment analysis tool and processed it on BigQuery, used insights to ship data-backed feature improvements, and lifted app rating from 3.9 to 4.2, improving CSAT by 15% in 8 months
- Reduced manual processing time by 45% by streamlining KYC docs verification using OCR and improving client experience
- Built a risk monitoring framework to flag 700K+ high-risk financial transactions, improving platform reliability by 55%
- Synthesized 5+ SQL and BigQuery dashboards to track client engagement, fraud exposure, and operational KPIs, enabling leadership to monitor performance metrics and improve decision-making speed

PROJECTS

Machine Learning Developer, *CFashion - Fashion Recommendation application for color-blind users*

Developed a multi-modal recommendation engine using Mask R-CNN, K-Means Clustering, and Random Forest models on a custom-built men's fashion dataset, improving customer satisfaction by 30% across 15+ iterative MVP releases

Software Developer & Research Assistant, *Fin Audit- Enterprise Financial Risk & Cost Analytics Platform*

Developed and deployed a financial analytics platform for large enterprises to monitor operational cost exposure and risk trends, improving reporting accuracy by 85% and enabling data-driven capital allocation decisions

SKILLS

Product: Roadmapping, Feature Prioritization, UI/UX, User Story, Agile, A/B Testing, GTM, Acceptance Criteria, PRDs, OKRs, KPIs, Stakeholder Management, Cross-functional collaboration, Market Research, Competitive Strategies, Prototyping, Product Launch
Tools: Jira, Confluence, SharePoint, Word, Excel, Figma, Miro, Azure DevOps, PowerPoint, Teams, Google Analytics, Canva, Notion
Technical: API, SQL, Python, C/C++, Tableau, Power BI, System Design, Git/GitHub, R, RStudio, Web/ App Development, NLP, AWS
AI Tools: Automation tools, Multi-Agent Systems, RAG Pipelines, Custom LLMs, Model Context Protocol, Prompt Engineering

EDUCATION

Duke University | Master of Engineering Management (Tech MBA) | GPA: 3.93/ 4.0 Durham, *USA | Aug 2025 - Dec 2026*
Coursework: Business Development, Managing Product Design, Market Research, Marketing, Product Commercialization

Mumbai University | Bachelor of Engineering in Computer Engineering | GPA: 3.92/ 4.0 Mumbai**,** *India* **|** *Aug 2019 - May 2023*
Coursework: Computer Science, Software Ecosystem Development, GCP, Cloud Migration, NLP, Big Data Analytics, SQL
